

WELCOME

NEXNEX COIN

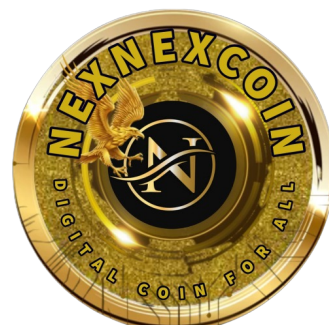

Introduction

NexnexCoin is for all people, tribes, languages and nations.

Introduction

NexnexCoin is powered by NexnexTechnology Company, and we have other Applications beside the Nexnexcoin ecosystem. These products will help nexnexcoin to be in constant usage globally so that the coin will last for decades. We do not want Nexnexcoin to end only at the exchanges or suddenly fall like other coins, there should be normal and constant global usage like the way people use dollars globally to buy goods and services daily.

Abstract

NexnexCoin is to create a simple alternative payment system for everyone to be able to use NexnexCoin to buy goods and services online and offline.

Purpose:

The purpose of this initial coin offering is targeted at solving a problem of talented young people living in obscurity. Most of such young people are living in the villages in over 150 countries on the earth... They are gifted and talented but there is no specific social media app to bring them to limelight. We are creating a social media app that will be used in all countries to specifically target these group of young people so that the world can see their unique gifts.

Such talents will benefit the world and they too could have a source of income or offer voluntary service.

The app shall be a database to gather various talents "Den of Talens." It shall be like America got talent, Nigeria idol, or talent show, but ours will be done through a social media set up.

It will be great!

Nexnex Coin Product

Nexnex Market:

This platform is like Amazon, Jumia or Fiverr, where buyers and sellers meet and they will use Nexnexcoin as the currency.

Nexnex Social Media:

This is a social media app like YouTube or TikTok. People will earn cash using our social media and nexnexcoin will be added as a means of payment.

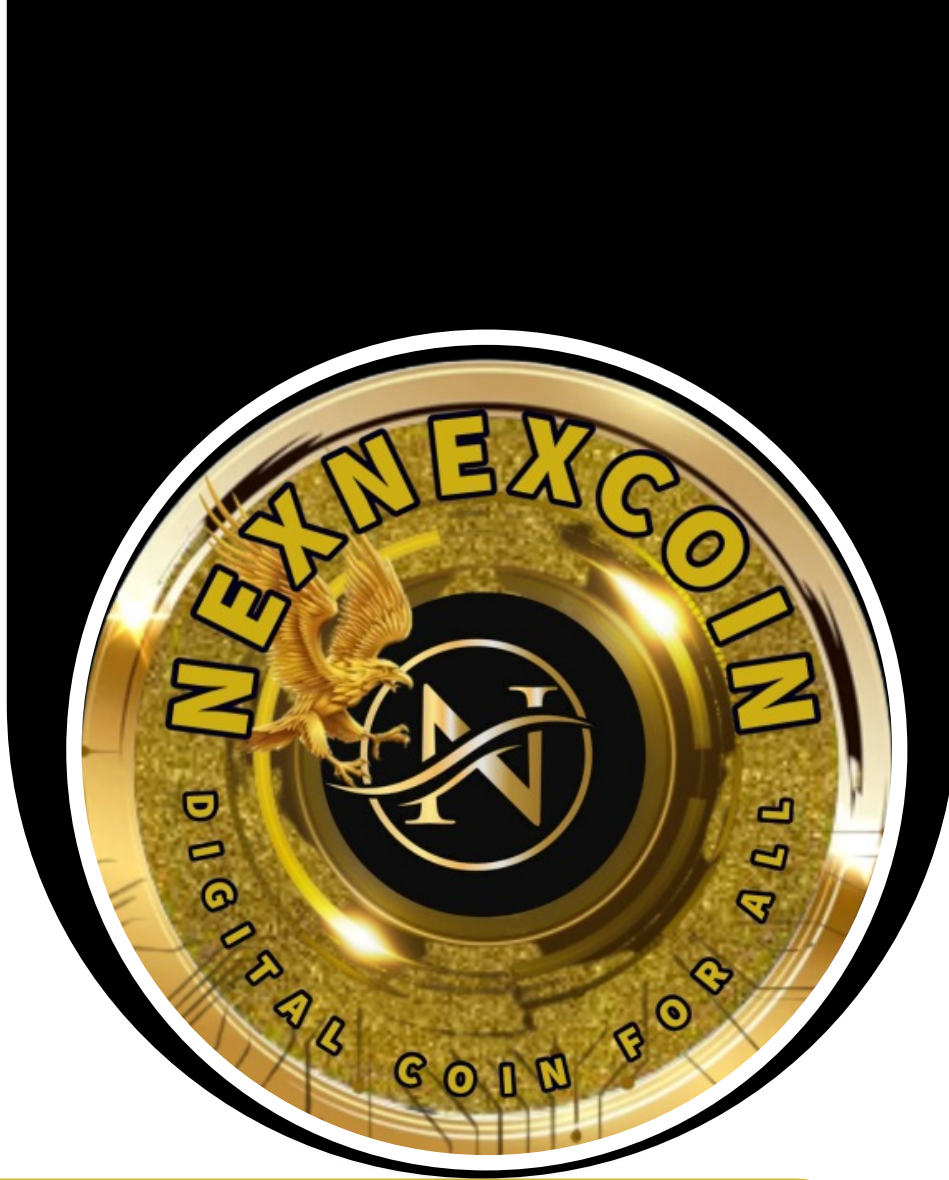

Nexnex Fund:

This is a crowdfunding platform for those who want to raise money for their businesses or cause.

Nexnex A.I

This is an artificial intelligence to help you write books, articles or contents without knowing what to write.

Other Products:

Nexnex Translator:

You can use this App to translate information in over 100 languages.

Nexnex URL Shorter:

This platform helps you to reduce long links or url, and you can track who is seeing it and the locations it is spreading in any part of the world.

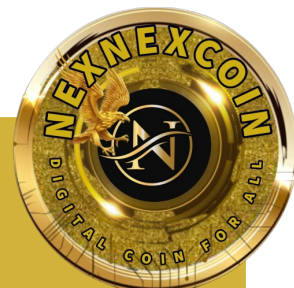

Nexnex Other Features:

We have other Apps that people would use, NexnexCoin will be one of the medium of payments in all our platforms.
